Employee Unique Identification Number (EUN) is a unique number allotted to Sales personnel i.e. employee/ relationship manager/ sales person of the distributor interacting with the investor for the sale of mutual fund products. Such sales personnel associated with Distributor, should also be holding a valid NISM certificate. **Thus, in case of applications routed through distributors, in addition to the AMFI Registration Number (ARN) of the distributor, investors are requested to also provide the EUIN of the individual ARN holder or of employee/relationship manager/sale person of the Distributor interacting with the investor.** Providing appropriate EUIN in the application/transaction forms would assist in tackling the problem of mis-selling even if the Sales personnel on whose advice the transaction was executed by investor leaves the employment of the distributor or his/her sub broker. If the distributor has not given any advice pertaining to the investment (i.e. transaction is 'execution only'), then the EUIN box may be left blank, but it would be mandatory for the investor to provide confirmation as mentioned in the application form.

 - a. Value STP is a facility wherein Unit holder(s) can opt to transfer variable amounts into the Transferee Scheme from the Transferor Scheme on the date of transfer at predetermined intervals.  - b. The first Value STP installment will be processed for the first installment amount specified by the Unitholder at the time of enrolment.  - c. On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that month [(first installment amount) X (number of installments; including the current installment)], then there would be no transfer effected from the Transferor Scheme.
 - d. If the amount of transfer as calculated by the above formula is less than Rs.500, then the default amount of Rs. 500 will be transferred to the Transferee Scheme. However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed installment amount only as specified by the Unitholder at the time of enrolment.
 - e. The total amount invested through Value STP over its tenure in the Transferee Scheme, may be higher or lower than the Total Investment Value of the investment i.e. the [(first installment amount) X (total number of installments specified by the Unitholder)].  - g. The frequencies available under this facility are as follows: Monthly & Quarterly
 - h. The minimum number of installments and amount for enrolment to avail Value STP are as below:

Calculation of Value STP amount of the second installment i.e. 16-Feb-15:

- First Installment Amount- Rs. 10000/-
 - Number of installments including the current installment is 2
 - Total of 63.3995 units allotted up to the date of last installment i.e. January 2015 in ABSL Front Line Equity- Growth. The NAV of ABSL Front Line Equity- Growth on February 16, 2015 is 167.92/- per unit. Hence the market value of the investment in ABSL Front Line Equity- Growth on the date of transfer is Rs. 1,0646.04 [167.92 X 63.3995].
 - Amount Derived from second installment Amount from the formula - [(First installment amount) X (Number of installments including the current installment)] - (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer) - [(Rs 10000) X 2] - Rs. 10,646.04 = Rs. 9,353.96

Type of Scheme	An Open ended Growth Scheme	An Open ended Growth scheme																					
Investment Objective	The objective of the scheme is to achieve long-term growth of capital, at relatively moderate levels of risk through a diversified research based investment approach.	The objective of the scheme is to provide capital growth and income by investing primarily in a well-diversified portfolio of dividend paying companies that have a relatively high dividend yield.																					
Inception Date	February 24, 1995	February 26, 2003																					
No. of Folios & AUM (As on June 30, 2017)	Folios: 219175 AUM in Crs: ₹ 3,705.70	Folios: 87253 AUM in Crs: ₹ 1,059.90																					
Asset Allocation Pattern of the Scheme	<p>Under normal circumstances, the asset allocation pattern shall be as under:</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Asset Allocation</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equity & Equity Related Instruments</td> <td>At least 70%</td> <td>Medium to High</td> </tr> <tr> <td>Debt Securities & Money Market instruments</td> <td>Upto 30%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The Scheme is a growth scheme and aims primarily at capital appreciation. Given the expectation of substantial growth of the Indian economy (and hence, for Indian capital markets as well), normally at least 70% of the funds will be invested in equities or related instruments. The balance would be invested in debt and money market instruments, encompassing both short-term and long-term considerations. In a situation of extreme volatility in equity markets, the equity allocation may be reduced below 70%, in favour of debt instruments, money market instruments or cash. Short-term debt considerations for this open-end scheme include maintaining an adequate float to meet anticipated levels of redemptions, expenses, and other liquidity needs. A portion of funds may also be kept in cash or cash equivalents. Investments will be in listed securities from all Indian Stock Exchanges including the National Stock Exchange and the OTC Exchange of India. Investments may also be made in unlisted transferable securities. The securities would cover secondary market purchases, Initial Public Offers (IPOs), other public offers, placements, right offers, negotiated deals, etc. Investment policies of the Scheme shall reflect restrictions for mutual fund investments established by SEBI. In addition, certain investment parameters (such as limits on portfolio exposure to sectors, industries, business houses, etc.) may be adopted internally by BSLAMC, and amended from time to time, to ensure appropriate diversification of the Scheme.</p> <p>The scheme may also invest upto 50% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.</p> <p>Under normal circumstances each scheme shall not have an exposure of more than 15% of its net assets in foreign securities. However, the AMC with a view to protecting the interests of the investors, may increase exposure in foreign securities as deemed fit from time to time</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.</p> <p>Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.</p>	Instrument	Asset Allocation	Risk Profile	Equity & Equity Related Instruments	At least 70%	Medium to High	Debt Securities & Money Market instruments	Upto 30%	Low to Medium	<p>Under normal circumstances, the asset allocation of the Scheme will be as follows:</p> <p>The scheme would invest in primarily in equity stocks that have a relatively high dividend yield (i.e. dividend paid in the previous year divided by the current market price), at the point of investment. The Scheme is defining dividend yield as 'high' if it is greater than the dividend yield of Nifty last released/ published by NSE.</p> <p>The following table provides the asset allocation (as a % of Net Assets) of the portfolio under normal circumstances:</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Asset Allocation</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>'High' Dividend Yield Equity and Equity Related Instruments</td> <td>65 - 100%</td> <td>High</td> </tr> <tr> <td>Other Equity and Equity Related Instruments</td> <td>0 - 35%</td> <td>High</td> </tr> <tr> <td>Debt and Money Market Instruments</td> <td>0 - 20%</td> <td>Low</td> </tr> </tbody> </table> <p>Considering the inherent characteristics of the scheme, equity positions would have to built-up gradually and also sold off gradually. This would necessarily entail having large cash position before the portfolio is fully invested and during periods when equity positions are being sold off to book profits/losses or to meet redemption needs.</p> <p>While the bulk of investments would be in high dividend yielding stocks, the scheme may, from time to time, in order to encash on certain opportunities, invest in 'special situations' like share buy-backs, de-listing opportunities or during mergers and acquisitions. These 'special situations' entail very low risk, and at the same time have a good potential to boost returns. However, the Fund Manager expects such opportunities to be rare. At all times, the fund would remain invested in high dividend yielding stocks to the extent of at least 65% of total equity assets.</p> <p>Under normal circumstances, when the portfolio is fully invested, asset allocation towards cash & money market instruments would not exceed 10% of the portfolio.</p> <p>The above percentages would be adhered to at the point of investment in a stock. The portfolio would be reviewed quarterly to address any deviations from the aforementioned allocations due to market changes.</p> <p>The scheme may also invest upto 50% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.</p> <p>Under normal circumstances the scheme shall not have an exposure of more than 15% of its net assets in foreign securities. Name(s) of the Scheme(s)	Aditya Birla Sun Life Midcap Fund	Aditya Birla Sun Life MNC Fund																											
Type of Scheme	An Open ended Growth scheme	An Open ended Growth Scheme																											
Investment Objective	The investment objective of the scheme is long term growth of capital at controlled level of risk by investing primarily in 'Mid-Cap' Stocks. The level of risk is somewhat higher than a fund focused on large and liquid stocks. Concomitantly, the aim is to generate higher returns than a fund focused on large and liquid stocks.	The objective of the scheme is to achieve long term growth of capital at relatively moderate levels of risk by making investments in securities of multinational companies through a research based investment approach																											
Inception Date	October 03, 2002	December 27, 1999																											
No. of Folios & AUM (As on June 30, 2017)	Folios: 152347 AUM in Crs: ₹ 2,087.98	Folios: 235214 AUM in Crs: ₹ 3,150.85																											
Asset Allocation Pattern of the Scheme	<p>Under normal circumstances, the asset allocation pattern shall be as under:</p> <table border="1"> <thead> <tr> <th colspan="3">(% age of investible corpus)</th> </tr> <tr> <th>Instrument</th> <th>Asset Allocation</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equity and related instruments of Mid Cap Companies</td> <td>65%-100%</td> <td>High</td> </tr> <tr> <td>Equity and related instruments of Companies other than Mid Cap companies</td> <td>0-35%</td> <td>High</td> </tr> <tr> <td>Cash, Deposits & Money Market Instruments including Mibor linked short term papers</td> <td>0-20%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The scheme seeks to meet the objective by investing, normally, at least 65% of its total assets in Mid Cap stocks. For the purpose of determining mid cap stocks, the market capitalisation of companies would be considered. Currently, investment universe of the Mid Cap portion of the portfolio is in line with the range specified in the Benchmark Nifty Free Float Midcap 100 Index. This range would change in line with the change in the range of the market capitalisation criterion in the Benchmark.</p> <p>In order to diversify the portfolio and improve liquidity, the scheme may invest in upto 35% of its net assets in 'Large Cap' and 'Small Cap' companies. The Fund manager may invest a small portion of the corpus for liquidity needs in money market instruments. Normally such investments would not exceed a maximum limit of 20%.</p> <p>The scheme may also invest upto 50% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.</p> <p>Under normal circumstances the scheme shall not have an exposure of more than 15% of its net assets in foreign securities. However, the AMC with a view to protecting the interests of the investors, may increase exposure in foreign securities as deemed fit from time to time.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.</p> <p>Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.</p>	(% age of investible corpus)			Instrument	Asset Allocation	Risk Profile	Equity and related instruments of Mid Cap Companies	65%-100%	High	Equity and related instruments of Companies other than Mid Cap companies	0-35%	High	Cash, Deposits & Money Market Instruments including Mibor linked short term papers	0-20%	Low to Medium	<p>Under normal circumstances, the asset allocation pattern shall be as under:</p> <table border="1"> <thead> <tr> <th colspan="3">(% age of investible corpus)</th> </tr> <tr> <th>Instrument</th> <th>Asset Allocation</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equity & Equity Related Instruments</td> <td>Upto 100%</td> <td>Medium to High</td> </tr> <tr> <td>Debt Securities and Money Market Instruments</td> <td>Upto 20%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>A Multinational Company (MNC) is a company where a large portion of equity is held by an overseas multinational company or a group of overseas multinational companies and the day to day management is looked after by these company or companies, as the case may be.</p> <p>Multinational companies have traditionally enjoyed high confidence levels of the investors. The reasons are not difficult to fathom. These companies have done exceptionally well despite the unfavourable business environment in the past. The bourses have deservedly valued these companies at a premium for their quality of management, consistent growth rates, strong financial position, access to parent's technology and prudent accounting policies. The best examples are Hindustan Unilever Ltd., Cummins India Ltd., Pfizer India Ltd., Glaxo India Ltd., etc.</p> <p>While the past has been satisfactory for these companies, the future is very promising. with virtual stagnancy in most of the developed market, developing economies like India and China present tremendous opportunities for the multinationals. India, in particular, with its English speaking intellectually stimulated population, a vast market and a working legal system, provides a base for progressive multinationals. We expect MNCs to make fresh investments in areas like knowledge-based industries, services and infrastructure.</p> <p>The investors on their part would have the benefit of becoming a part of the global fraternity of shareholders of these MNCs through this scheme. India is perhaps the only country which has a confluence of multinational stocks listed on its exchanges.</p> <p>Normally at least 80% of the funds will be invested in equities or related instruments of such companies. The residual amount would be invested in debt and / or money market instruments of MNCs and / or Indian companies or cash. In a situation of extreme volatility in equity markets, the equity allocation may be reduced below 80%, in favour of debt and money market instruments or cash.</p> <p>The scheme may also invest upto 50% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.</p> <p>Under normal circumstances the scheme shall not have an exposure of more than 15% of its net assets in foreign securities. However, the AMC with a view to protecting the interests of the investors, may increase exposure in foreign securities as deemed fit from time to time.</p> <p>In accordance with the proviso to clause 10 of the Schedule VII to SEBI Regulations, the scrip wise limit of 10% is not applicable for investments in case of sector specific schemes. The upper ceiling on investments in case of the scheme shall be the weightage of the scrip in Nifty MNC index or 10% of the NAV of the scheme whichever is higher.</p> <p>Short-term debt considerations for this open-end scheme include maintaining an adequate float to meet anticipated levels of redemptions, expenses and other liquidity needs. A portion of funds may also be kept in cash or cash equivalents.</p> <p>Investments will be in listed securities from all Indian Stock Exchanges. Investments may also be made in unlisted transferable securities, up to a maximum of 10% of the net assets of the Scheme. The securities would cover secondary market purchases, Initial Public Offers (IPOs), other public offers, placements, rights offers, negotiated deals, etc. Investments may also be made in companies listed on international exchanges, whenever the Indian regulations permit.</p> <p>Investment policies of the scheme shall reflect restrictions for mutual fund investments established by SEBI. In addition, internal prudential parameters will be observed, in order to ensure appropriate risk-return profile of the Scheme.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration. Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Asset Allocation Pattern of the Scheme	<p>Under normal circumstances, the asset allocation pattern shall be as under: (% age of investible corpus)</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Normal Allocation</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Securities covered by the Nifty including Derivatives (upto50%)</td> <td>Upto100%</td> <td>Medium to High</td> </tr> <tr> <td>Cash & Money Market Instruments including Mibor linked instruments</td> <td>0 to10%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The net assets of the scheme will be invested predominantly in stocks constituting the Nifty 50 and / or in exchange traded derivatives on the Nifty 50. This would be done by investing in almost all the stocks comprising the Nifty 50 in approximately the same weightage that they represent in the Nifty 50 Index and / or investing in derivatives including futures contracts and options contracts on the Nifty 50 Index. A small portion of the net assets will be invested in money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme.</p> <p>Change in Investment Pattern</p> <p>As an index linked scheme, the investment policy is primarily passive management. However, the above mentioned investment pattern is indicative and may change for short duration. In the event the Nifty 50 is dissolved or is withdrawn by India Index Services Limited (IISL) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the scheme so as to track a different suitable index and/ or to suspend tracking the Nifty and appropriate intimation of the same will be sent to the Unit holders of the scheme. In such a case, the investment pattern will be modified suitably to bring it in line with the composition of the securities that are included in the new index to be tracked and the performance of the scheme will be subject to tracking errors during the intervening period.</p>	Instrument	Normal Allocation	Risk Profile	Securities covered by the Nifty including Derivatives (upto50%)	Upto100%	Medium to High	Cash & Money Market Instruments including Mibor linked instruments	0 to10%	Low to Medium	<p>Under normal circumstances, the asset allocation pattern shall be as under: (% age of investible corpus)</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Range</th> <th>Normal Allocation</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equity and Equity related Securities out of which</td> <td>80%-100%</td> <td>90%</td> <td>Medium to High</td> </tr> <tr> <td>- Top 100 Market Cap Companies</td> <td>65%-100%</td> <td>70%</td> <td>Medium to High</td> </tr> <tr> <td>- Other Companies</td> <td>0%-35%</td> <td>20%</td> <td>Medium to High</td> </tr> <tr> <td>Money market instruments</td> <td>0%-20%</td> <td>10%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The scheme may also invest upto 50% of the net assets of the scheme in derivative instruments for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI (MF) Regulations. As and when the Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.</p> <p>If permitted by SEBI under extant regulations/guidelines, the scheme may also engage in stock lending subject to a maximum of 25%, in aggregate, of the net assets of the scheme and in case of a single intermediary. There can be temporary illiquidity of the securities that are lent out and the Fund may not be able to sell such lent-out securities, resulting in an opportunity loss. In case of a default by counterparty, the loss to the fund can be equivalent to the securities lent.</p> <p>The scheme may invest upto 25% of its net assets in ADRs/GDRs and equities of listed overseas companies, which in the judgment of the Asset Management Company are eligible for investment as part of the scheme's portfolio and are consistent with the investment strategy, subject to the investment restrictions specified by SEBI / RBI from time to time.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.</p> <p>Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.</p>	Instrument	Range	Normal Allocation	Risk Profile	Equity and Equity related Securities out of which	80%-100%	90%	Medium to High	- Top 100 Market Cap Companies	65%-100%	70%	Medium to High	- Other Companies	0%-35%	20%	Medium to High	Money market instruments	0%-20%	10%	Low to Medium

Listed securities may be listed on any of the recognised Indian stock exchanges including the National Stock Exchange and the OTCEI. Investments may be made as secondary market purchases, initial public offers, private placements, negotiated investments, rights offers, etc. The Mutual Fund under this Scheme may invest in non-publicly offered debt securities (including convertible securities). The investments may have tenors that could be short-term (i.e. less than one year) or long-term (i.e. greater than one year). The Scheme reserves the right to invest in newer investment products including foreign securities (i.e. offshore investments) subject to approval of the Trustee Company and in compliance with the applicable SEBI Regulations. From time to time it is possible that the portfolio may hold cash.</p> <p>The portion of the Scheme's portfolio invested in each type of security will vary in accordance with economic conditions, the general level of stock prices, interest rates and other relevant considerations, including the risks associated with each investment. The Scheme will, in order to reduce the risks associated with any one security, utilize a variety of investments and performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions.</p> <p>Not more than 5% of the net assets of the Scheme may be invested in equity and equity-related securities that are not listed on any stock exchange (including the OTCEI). Any such investments will only be made if the Asset Management Company believes that such securities may be listed within a two-year period. This policy, however, is not applicable to the Scheme's acquisition of equity and equity-related securities in initial public offerings that at the time of acquisition are not yet either listed or quoted on any stock exchange, but pursuant to the terms of such initial public offering will be so listed. The Mutual Fund under this Scheme, will not invest more than 10% of its net assets in the debt (including non-publicly offered debt securities) and money market securities of any one issuer excluding call money.</p> <p>Upto 5% of the Scheme's net assets may be invested in unlisted equity and equity-related securities as stated in the previous paragraph. Further, since a significant section of the debt market consists of non-publicly offered debt securities, the Scheme could invest upto 20% of its net assets (i.e. its entire allocation to debt and money market securities) in non-publicly offered debt securities. In the event investments made in unlisted equity and equity-related securities and non-publicly offered debt securities affect the ability of the Scheme to make redemption payments within the stipulated time frame set forth herein then redemption payments.</p> <p>The Scheme also intends to participate in derivatives trading within the equity component of their portfolios. The scheme intends to use derivatives instruments like options on stocks and stock indices, interest rate swaps, forward rate agreements or such other derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging, portfolio balancing and other permitted usages as provided under the regulations and guidelines. The value of derivative contracts outstanding will be limited to 50% of net assets of the scheme. RBI has permitted Mutual Funds to participate in Interest Rate Swaps and Forward Rate Agreements. SEBI has also permitted trading of interest rate derivatives through stock exchanges.</p> <p>The scheme may also trade in these instruments</p> <p>The Scheme intends to invest in ADR/GDR of Indian companies subject to a limit based on the net assets of the Mutual Fund in accordance with SEBI Guidelines issued from time to time</p> <p>Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.</p> <p>Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.</p>	(% age of investible corpus)			Instrument	Target Allocation	Range	Equity and Equity Related Instruments	90%	80%-100%	Debt & Money Market Instruments (including securitised debt)	10%	0%-20%	<p>Under normal circumstances, the asset allocation pattern shall be as under:</p> <table border="1"> <thead> <tr> <th colspan="4">(%age of investible corpus)</th> </tr> <tr> <th>Instrument</th> <th>Target Allocation</th> <th>Range</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equities & Equity related Instruments</td> <td>100%</td> <td>75%-100%</td> <td>Medium to High</td> </tr> <tr> <td>Debt Securities and Money market Instruments (Including Securitised Debt)</td> <td>0%</td> <td>0%-25%</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The Fund Manager will review the portfolio for adherence with the above asset allocation patterns and rebalance within 30 days to conform to the above limits.</p> <p>Investments may be made in listed or unlisted instruments. Name(s) of the Scheme(s)	Aditya Birla Sun Life New Millennium Fund		
Type of Scheme	An Open ended Growth Scheme		
Investment Objective	The primary investment objective of the scheme is to generate long term growth of capital, through a portfolio with a target allocation of 100% equity, focusing on investing in technology and technology dependent companies, hardware, peripherals and components, software, telecom, media, internet and e-commerce and other technology enabled companies. The secondary objective is income generation and distribution of dividend.		
Inception Date	January 15, 2000		
No. of Folios & AUM (As on June 30, 2017)	Folios: 12097 AUM in Crs: ₹ 65.93		
Asset Allocation Pattern of the Scheme	Under normal circumstances, the asset allocation pattern shall be as under: (% age of investible corpus)		
	Instrument	Target Allocation	Allocation Range
	Equity & Equity Related Instruments	100%	80%-100%
	Debt & Money Markets instruments (including securitised debt)	0%	0%-20%
	The Fund Manager will review the portfolio for adherence with the above asset allocation patterns and rebalance them within 30 days to conform to the above limits. From time to time it is possible that the portfolios may hold cash. The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by them as per the guidelines and regulations applicable to such transactions. The Scheme also intends to participate in derivatives trading within the equity component of their portfolios. The scheme intends to use derivatives instruments like options on stocks and stock indices, interest rate swaps, forward rate agreements or such other derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging, portfolio balancing and other permitted usages as provided under the regulations and guidelines. The value of derivative contracts outstanding will be limited to 50% of net assets of the scheme. RBI has permitted Mutual Funds to participate in Interest Rate Swaps and Forward Rate Agreements. SEBI has also permitted trading of interest rate derivatives through stock exchanges. The scheme may also trade in these instruments. The Scheme intends to invest in ADR/GDR of Indian companies subject to a limit based on the net assets of the Mutual Fund in accordance with SEBI Guidelines issued from time to time. The Scheme also reserve the right to invest in newer investment products subject to approval of the Trustee Company and in compliance with the applicable SEBI Regulations. Investments may be made in listed or unlisted instruments. Listed securities may be listed on any of the recognised Indian stock exchanges including the National Stock Exchange and the OTCEI. Investments may be made as secondary market purchases, initial public offers, private placements, negotiated investments, rights offers, etc. The Mutual Fund under each Scheme may invest in non-publicly offered debt securities (including convertible securities). The portfolio invested in each type of security will vary in accordance with economic conditions, the general level of stock prices, interest rates and other relevant considerations, including the risks associated with each investment. The Scheme will, in order to reduce the risks associated with any one security, utilise a variety of investments, performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions. Not more than 5% of the net assets of each Scheme may be invested in equity and equity-related securities that are not listed on any stock exchange (including the OTCEI). Any such investments will only be made if the Asset Management Company believes that such securities may be listed within a two-year period. This policy, however, is not applicable to each Scheme's acquisition of equity and equity-related securities in initial public offerings that at the time of acquisition are not yet either listed or quoted on any stock exchange, but pursuant to the terms of such initial public offering will be so listed. The Mutual Fund under each Scheme, will not invest more than 10% of its net assets in the debt (including non publicly offered debt securities) and money market securities of any one issuer excluding call money. Upto 5% of the net assets of each scheme may be invested in unlisted equity and equity-related securities as stated in the previous paragraph. Further, since a significant section of the debt market consists of non-publicly offered debt securities, each Scheme could invest upto 20% of its net assets (i.e. its entire allocation to debt and money market securities) in non-publicly offered debt securities. In accordance with the proviso to clause 10 of the Schedule VII to SEBI Regulations, the scrip wise limit of 10% is not applicable for investments in case of sector specific schemes. The upper ceiling on investments in case of the schemes shall be the weightage of the scrip in respective benchmark index (for BSLNMF: BSE Teck and BSLBYIF: BSE 200) or 10% of the NAV of the scheme whichever is higher. Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI. Change in Asset Allocation The above mentioned investment pattern is indicative and may change for short duration. Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.

Not more than 5% of the net assets can generally be deployed in Stock Lending to any single counter party. <p>Change in Asset Allocation</p> <p>Investments made by the Scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in. The Scheme may also use various derivatives products for the purpose of hedging and portfolio balancing from time to time, with an attempt to protect the value of the portfolio and enhance Unitholders' interest. Name(s) of the Scheme(s)	Aditya Birla Sun Life Balanced '95 Fund	Aditya Birla Sun Life Balanced Advantage Fund																														
Type of Scheme	An Open ended Balanced Scheme	An Open ended Asset Allocation Scheme																														
Investment Objective	The objective of the scheme is to generate long term growth of capital and current income, through a portfolio with a target allocation of 60% equity and 40% debt and money market securities. The secondary objective is income generation and distribution of dividend.	The primary objective of the Scheme is to generate long term growth of capital and income distribution with relatively lower volatility by investing in a dynamically balanced portfolio of Equity & Equity linked investments and fixed-income securities.																														
Inception Date	February 10, 1995	April 25, 2000																														
No. of Folios & AUM (As on June 30, 2017)	Folios: 266297 AUM in Crs: ₹ 9,280.96	Folios: 36896 AUM in Crs: ₹ 1,475.09																														
Asset Allocation Pattern of the Scheme	<p>Under normal circumstances, the asset allocation of the Scheme will be as follows:</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Target Allocation</th> <th>Allocation Range</th> </tr> </thead> <tbody> <tr> <td>Equity & Equity Related Instruments</td> <td>60%</td> <td>50% - 75%</td> </tr> <tr> <td>Debt & Money Market instruments (including securitised debt)</td> <td>40%</td> <td>25% - 40%</td> </tr> <tr> <td>Units issued by REITs & InvITs</td> <td>-</td> <td>0%-10%</td> </tr> </tbody> </table> <p>The portfolio asset allocation policy indicated above is consistent with the policy that the Scheme has followed since inception and which has been disclosed to Unitholders through the Mutual Fund's newsletter.</p> <p>Under normal market conditions the Scheme attempts to achieve long- term growth of capital by investing in common stock and other equity-type instruments. It will try to achieve a competitive level of current income and capital appreciation through investments in debt securities and a high level of current income through investments in money market instruments.</p> <p>The portion of the Scheme's portfolio invested in each type of security will vary in accordance with economic conditions, the general level of stock prices, interest rates and other relevant considerations, including the risks associated with each investment. The Scheme will, in order to reduce the risks associated with any one security, utilize a variety of investments and performance will depend on the Asset Management Company's ability to assess accurately and react to changing market conditions.</p> <p>The Scheme also intends to participate in derivatives trading within the equity component of their portfolios. The scheme intends to use derivatives instruments like options on stocks and stock indices, interest rate swaps, forward rate agreements or such other derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging, portfolio balancing and other permitted usages as provided under the regulations and guidelines. The value of derivative contracts outstanding will be limited to 50% of net assets of the scheme. RBI has permitted Mutual Funds to participate in Interest Rate Swaps and Forward Rate Agreements. SEBI has also permitted trading of interest rate derivatives through stock exchanges. The scheme may also trade in these instruments</p> <p>The Scheme intends to invest in ADR/GDR of Indian companies subject to a limit based on the net assets of the Mutual Fund in accordance with SEBI Guidelines issued from time to time.</p> <p>From time to time it is possible that the portfolio may hold cash. Investments may be made in listed or unlisted instruments. Listed securities may be listed on any of the recognised Indian stock exchanges including the National Stock Exchange and the Over-the-Counter Exchange of India ("OTCEI"). Investments may be made as secondary market purchases, initial public offers, private placements, negotiated investments, rights offers, etc. The Mutual Fund under this Scheme may invest in non-publicly offered debt securities (including convertible securities). The investments may have tenors that could be short-term (i.e. less than one year) or long-term (i.e. greater than one year). The Scheme reserves the right to invest in newer investment products including foreign securities (i.e. offshore investments) subject to approval of the Trustee Company and in compliance with the applicable SEBI Regulations.</p> <p>Not more than 5% of the net assets of the Scheme may be invested in equity and equity-related securities that are not listed on any stock exchange (including the OTCEI). Any such investments will only be made if the Asset Management Company believes that such securities may be listed within a two-year period. This policy, however, is not applicable to the Scheme's acquisition of equity and equity related securities in initial public offerings that at the time of acquisition are not yet either listed or quoted on any stock exchange, but pursuant to the terms of such initial public offering will be so listed. The Mutual Fund under this Scheme, will not invest more than 10% of its net assets in the debt (including non publicly offered debt securities) and money market securities of any one issuer excluding call money.</p> <p>Upto 5% of the Scheme's net assets may be invested in unlisted equity and equity-related securities as stated in the previous paragraph. Further, since a significant section of the debt market consists of non-publicly offered debt securities, the Scheme could invest upto 25% of its net assets in non publicly offered debt securities.</p> <p>Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations,1996 and other guidelines or notifications that may be issued by SEBI.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. Asset Allocation Pattern of the Scheme	<p>Under normal circumstances, the asset allocation of the Scheme will be as follows:</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Risk Profile</th> <th>Normal Allocation (% of total Assets)</th> </tr> </thead> <tbody> <tr> <td>Equity & Equity related securities of Manufacturing Sector Companies</td> <td>High</td> <td>80-100%</td> </tr> <tr> <td>Cash, Money Market & Debt instruments</td> <td>Low</td> <td>0-20%</td> </tr> </tbody> </table> <p>The scheme may invest in derivatives instruments upto 50% of net assets subject to provisions specified in SEBI Circular no. DNP/Cir 29/2005 dated September 14, 2005 and SEBI Circular No. DNP/Cir- 30/2006 dated January 20, 2006, SEBI circular No. SEBI/DNP/Cir-31/2006 dated September 22, 2006, SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 and such other SEBI guidelines issued from time to time. The scheme may take exposure through derivative transactions in the manner and subject to limit as may be specified by SEBI from time to time. In accordance with SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010, the cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the scheme.</p> <p>The scheme may also invest up to 30% of the Debt allocation in securitized debt instruments except foreign securitized debt.</p> <p>The Scheme may undertake Stock Lending transactions, in accordance with the framework relating to securities lending and borrowing specified by SEBI, within following limits</p> <ol style="list-style-type: none"> Not more than 20% of the net assets can generally be deployed in Stock Lending Not more than 5% of the net assets can generally be deployed in Stock Lending to any single counter party. <p>The scheme does not intend to invest in Credit default Swaps, repo in corporate debt securities and/or (Fixed income) derivative instruments.</p> <p>The scheme shall not invest in foreign securities.</p> <p>The scheme shall not engage in short selling activities.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. The Fund Manager shall rebalance the portfolio within 30 days from the date of deviation to bring it in line with the asset allocation pattern as indicated in this SID. Further, in case the rebalancing is not done within the specified period, justification for the same shall be provided to the Investment Committee and the reason for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action.</p> <p>Provided further and subject to the above, any change in the asset allocation affecting the investment profile of the Scheme shall be effected only in accordance with the provisions of sub regulation (15A) of Regulation 18 of the SEBI (MF) Regulations.</p>	Instrument	Risk Profile	Normal Allocation (% of total Assets)	Equity & Equity related securities of Manufacturing Sector Companies	High	80-100%	Cash, Money Market & Debt instruments	Low	0-20%	<p>Under normal circumstances, the asset allocation of the Scheme will be as follows:</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Risk Profile</th> <th>Indicative Allocation (% of total Assets)</th> </tr> </thead> <tbody> <tr> <td>Equity & Equity Related instruments including derivatives</td> <td>Medium to High</td> <td>65-80%</td> </tr> <tr> <td>Out of which:</td> <td></td> <td></td> </tr> <tr> <td>- Cash-futures arbitrage*: 20% - 60%</td> <td>Low to Medium</td> <td></td> </tr> <tr> <td>- Net long equity exposure**: 20% - 45%</td> <td>High</td> <td></td> </tr> <tr> <td>Debt & Money market Instruments (including margin for derivatives)</td> <td>Low</td> <td>20-25%</td> </tr> <tr> <td>Units issued by REITs & InvITs</td> <td>Medium to High</td> <td>0-10%</td> </tr> </tbody> </table> <p>*The exposure to derivative shown in the above asset allocation tables would normally be the exposure taken against the underlying equity investments and should not be considered for calculating the total asset allocation. This denotes only hedged equity positions by investing in arbitrage opportunities in the equity market. The fund manager in the above case can therefore take exposure to equivalent stock/ index futures & create completely covered positions. E.g. – The scheme invests 65% in equity stocks/index basket in the cash market and takes short position in futures market for relevant stocks/ index to the extent of exactly 65% to avail arbitrage between spot & futures market. Thus the entire position is used to lock arbitrage profit.</p> <p>**This denotes only net long equity exposures aimed to gain from potential capital appreciation of these positions. Thus it is a directional equity exposure which is not hedged.</p> <p>The scheme may invest in derivatives instruments upto 50% of net assets subject to provisions specified in SEBI Circular no. DNP/Cir 29/2005 dated September 14, 2005 and SEBI Circular No. DNP/Cir- 30/2006 dated January 20, 2006, SEBI circular No. SEBI/DNP/Cir-31/2006 dated September 22, 2006, SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010 and such other SEBI guidelines issued from time to time. The scheme may take exposure through derivative transactions in the manner and subject to limit as may be specified by SEBI from time to time. In accordance with SEBI Circular No. Cir/ IMD/ DF/ 11/ 2010 dated August 18, 2010, the cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the scheme.</p> <p>The scheme may take exposure in repo / reverse repo transactions in Corporate Debt Securities. The scheme shall participate in repo transactions only in AA and above rated corporate debt securities. The gross exposure to repo transactions in corporate debt securities shall not be more than 10 % of the net assets. The cumulative gross exposure through repo transactions in corporate debt securities along with corporate debt and money market instruments and derivative positions shall not exceed 100% of the net assets of the scheme. The scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.</p> <p>The scheme does not intend to invest in Foreign Securities and Credit default Swaps.</p> <p>The scheme shall not engage in securities lending/short selling activities.</p> <p>If the debt/ money market instruments offer better returns than the arbitrage opportunities available in cash and derivatives segments of equity markets then the investment manager may choose to have a lower equity exposure. In such defensive circumstances the asset allocation will be as per the below table:</p> <table border="1"> <thead> <tr> <th>Instrument</th> <th>Risk Profile</th> <th>Indicative Allocation (% of total Assets)</th> </tr> </thead> <tbody> <tr> <td>Equity & Equity Related instruments including derivatives</td> <td>Medium to High</td> <td>20-65%</td> </tr> <tr> <td>Out of which:</td> <td></td> <td></td> </tr> <tr> <td>- Cash-futures arbitrage*: 0% - 45%</td> <td>Low to Medium</td> <td></td> </tr> <tr> <td>- Net long equity exposure**: 20% - 45%</td> <td>High</td> <td></td> </tr> <tr> <td>Debt & Money market Instruments (including margin for derivatives)</td> <td>Low</td> <td>35-80%</td> </tr> </tbody> </table> <p>*This denotes only hedged equity positions by investing in arbitrage opportunities in the equity market. The fund manager in the above case can therefore take exposure to equivalent stock/ index futures & create completely covered positions.</p> <p>**This denotes only net long equity exposures aimed to gain from potential capital appreciation of these positions. Thus it is a directional equity exposure which is not hedged.</p> <p>The above asset allocation for defensive consideration will be for a maximum period of 30 days within which the asset allocation will be rebalanced back to as indicated for normal circumstances. Any further deviation over the period of 30 days in the rebalancing would be referred to the Investment Committee of Aditya Birla Sun Life Asset Management Company Limited for review and suggestions.</p> <p>Change in Asset Allocation</p> <p>The above mentioned investment pattern is indicative and may change for short duration.</p> <p>Subject to the SEBI (MF) Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the unit holders. Such changes in the investment pattern will be for short term and defensive considerations. However, due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short-term purpose only, for defensive considerations and the intention being at all times to protect the interests of the Unit Holders. Risk Factors Specific to Aditya Birla Sun Life Index Fund

Tracking errors are inherent in any index fund and such errors may cause the schemes to generate returns which are not in line with the performance of the S&P Nifty 50 or one or more securities covered by / included in the Nifty 50 and may arise from a variety of factors including but not limited to:

1. Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividends, etc.
2. The index reflects the prices of securities at a point in time, which is the price at close of business day on National Stock Exchange of India Limited (NSE). The scheme, however, may trade these securities at

different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of each scrip on that day on the NSE. In addition, the scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance from NSE closing prices.

3. India Index Services & Products Limited (IISL) undertakes periodic reviews of the fifty securities that are represented in the Nifty and from time to time may exclude existing securities or include new ones. In such an event, the scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and may not permit precise mirroring of the Nifty during this period.
4. The potential of trades to fail may result in the scheme not having acquired the security at the price necessary to mirror the index.
5. Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
6. Being an open-ended scheme, the scheme may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions.
7. The scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to circuit filters in the securities, liquidity and volatility in security prices.
 - Due to the reasons mentioned above and other reasons that may arise, it is expected that the scheme may have a tracking error in the range of 2 to 3% per annum from its Benchmarks.
 - However, it needs to be clearly understood that this is just an indicative range and that the actual tracking error can be higher or lower than the range given.
 - In the event the S&P Nifty 50 is dissolved or is withdrawn by IISL or is not published due to any reason whatsoever, the Trustee reserves the right to modify the scheme so as track a different and suitable index or to suspend tracking the Nifty till such time it is dissolved / withdrawn or not published and appropriate intimation will be sent to the Unit holders of the scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the scheme will be subject to tracking errors during the intervening period.

Risk Factors Specific to Aditya Birla Sun Life Enhanced Arbitrage Fund

- The scheme will aim to generate absolute returns over and above money market returns/liquid funds. The performance of the scheme will depend on the ability of the fund manager to identify opportunities prevailing in terms of price spread (difference) in the cash and derivative market. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price spread in the equity markets. There may be instances where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the Fund Manager due to lack of opportunities in the derivative market may not be able to outperform liquid/money market funds. In addition to this, there can be increase in number of transactions as the fund manager has to take simultaneous calls in cash and derivative market, which may lead to high portfolio turnover and consequently will lead to high transaction costs.
- There can be no assurance or guarantee that the arbitrage opportunities may exist at all times in the capital market. The lack of arbitrage opportunities shall not provide an opportunity to the Fund Manager to exploit price discrepancies in the capital markets.
- Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement.
- The Fund intends to take advantage of opportunities arising out of corporate events like open offers, buy-back, merger, initial public offers, etc. The lack of such corporate events may lead to lack of opportunities to the Fund Manager.

Risk Factors Specific to Aditya Birla Sun Life India Reforms Fund

- The investments under the scheme are oriented towards equity/equity related securities of companies that are expected to benefit from reforms carried out by the Government. The performance of the scheme could be affected by the ability of the Government to effectively implement these reforms.

- As the scheme may hold securities that are not in the S&P CNX Nifty Index and may invest in limited number of sectors with higher concentration in certain sectors and industries, it may perform differently from the general stock markets.

Risk Factors Specific to Aditya Birla Sun Life Pure Value Fund

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

The Scheme proposes to invest in equity and equity related securities on the basis of value investment strategy. Equity securities by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors. Further, the securities invested by the scheme may take longer than the time expected by Fund Manager to appreciate, this may affect the returns of the scheme adversely.

Risk Factors Specific to Aditya Birla Sun Life Small & Midcap Fund

- The investments under the Scheme will be concentrated in the Small and Mid Cap segment and hence may perform differently than a broad market portfolio. Small and Mid Cap stocks are generally more volatile and less liquid as compared to Large Cap stocks. Further Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.
- Investing in companies which are part of the Nifty Midcap Index stocks is based on the premise that relatively small and midcap companies will increase their earnings and grow into larger, more valuable companies. However, as with all equity investing, there is the risk that a company will not achieve its expected earnings results, or that an unexpected change in the market or within the company will occur, both of which may adversely affect investment results. Historically, stocks which are part of the Nifty Midcap Index stocks have experienced greater volatility and they may be less liquid than larger cap stocks. Thus, relative to larger, more liquid stocks, investing in small and midcap stocks, involves potentially greater volatility and risk. The biggest risk of equity investing is that returns can fluctuate and investors can lose money.

Risk Factors Specific to Aditya Birla Sun Life Banking and Financial Services Fund

- Investing in a Sectoral fund is based on the premise that the Fund will seek to invest in companies belonging to a specific sector. This will limit the capability of the Fund to invest in other sectors.
- The scheme being sector specific will be affected by the risks associated with the Banking Sector and investments in Financial services companies which provide non banking financial services like housing finance, stock broking, wealth management, insurance companies and holding companies of insurance companies and hence concentration risk is expected to be high.
- Also, as with all equity investing, there is the risk that companies in that specific sector will not achieve its expected earnings results, or that an unexpected change in the market or within the company may occur, both of which may adversely affect investment results. Thus investing in a sector specific fund could involve potentially greater volatility and risk.

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc. The Scheme shall also be subject to risks associated with stock lending to the extent it engages in stock lending activities. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of dividends and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Dividend payouts will be entirely at the discretion of the Trustee. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

Risk factors Specific to Aditya Birla Sun Life Manufacturing Equity Fund

- Investing in a Sectoral fund is based on the premise that the Fund will seek to invest in companies belonging to specific sectors. This will limit the capability of the Fund to invest in other sectors.
- The scheme being sector specific will be affected by the risks associated with Manufacturing Sectors (in this case Manufacturing Sectors are sectors involved in Manufacturing activity and as defined in Investment Objective) and hence concentration risk is expected to be high.
- Also, as with all equity investing, there is the risk that companies in that specific sector will not achieve its expected earnings results, or that an unexpected change in the market (due to Government Policies or Macro Economic factors) or within the company may occur, both of which may adversely affect investment results. RISK FACTORS ASSOCIATED WITH INVESTMENTS IN UNITS OF REITS AND INVITS:

- Price-Risk or Interest-Rate Risk: REITs & InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- Credit Risk: In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. As these products are new to the market they are likely to be exposed to liquidity risk.
- Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk factors Specific to Aditya Birla Sun Life Manufacturing Equity Fund:

- Investing in a Sectoral fund is based on the premise that the Fund will seek to invest in companies belonging to specific sectors. This will limit the capability of the Fund to invest in other sectors.
- The scheme being sector specific will be affected by the risks associated with Manufacturing Sectors (in this case Manufacturing Sectors are sectors involved in Manufacturing activity and as defined in Investment Objective) and hence concentration risk is expected to be high.
- Also, as with all equity investing, there is the risk that companies in that specific sector will not achieve its expected earnings results, or that an unexpected change in the market (due to Government Policies or Macro Economic factors) or within the company may occur, both of which may adversely affect investment results. Thus investing in a sector specific fund could involve potentially greater volatility and risk.

Risk factors Specific to Aditya Birla Sun Life Equity Savings Fund:

- **Risks associated with investment in Arbitrage Strategies:**
 - The scheme will aim to generate absolute returns over and above money market returns/liquid funds. The performance of the scheme will depend on the ability of the fund manager to identify opportunities prevailing in terms of price spread (difference) in the cash and derivative market. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price spread in the equity markets. There may be instances where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the Fund Manager due to lack of opportunities in the derivative market may not be able to outperform liquid/money market funds. In addition to this, there can be increase in number of transactions as the fund manager has to take simultaneous calls in cash and derivative market, which may lead to high portfolio turnover and consequently will lead to high transaction costs.
 - There can be no assurance or guarantee that the arbitrage opportunities may exist at all times in the capital market. The lack of arbitrage opportunities shall not provide an opportunity to the Fund Manager to exploit price discrepancies in the capital markets.
 - Though the constituent stocks of most indexes are typically liquid, liquidity differs across stocks. Due to the heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement.
 - The Scheme intends to take advantage of opportunities arising out of corporate events like open offers, buy-back, merger, initial public offers, etc. The lack of such corporate events may lead to lack of opportunities to the Fund Manager.

- RISKS FACTORS ASSOCIATED WITH INVESTMENTS IN INTEREST RATE SWAPS:

Being intended for use as a hedge instrument, Interest rate swaps will primarily help in mitigating interest rate risk of the portfolio. However, it may be exposed to following types of risks:

- Counterparty risk – The counterparty risk is to the extent of gain made in any IRS transaction. To restrict such risks, the fund manager may consider booking profits and unwinding the position.
- Limitations on upside: IRS when used as hedging tool may also limit the profits if interest rates move in the opposite direction than anticipated.

- RISKS FACTORS ASSOCIATED WITH INVESTMENTS IN REPO TRANSACTIONS IN CORPORATE BOND:

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA.
- Collateral Risk: In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.
- In case of any Downgrade and shortfall in the collateral the Fund Manager shall arrange for additional collateral/cash within a period of 1 Business Day, equivalent to the amount of shortfall and if the counterparty is unable to provide additional collateral/cash then it shall tantamount to early termination of repo agreement.
- The NAVs of the underlying schemes where the Scheme have invested may be impacted generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in government policies, taxation laws or any other appropriate policies and other political and economic developments. Consequently, the NAV of the Scheme may fluctuate accordingly.
- The liquidity of the Scheme investments is inherently restricted by liquidity of Underlying Schemes.
- If the AMC charges an Exit load and the underlying schemes do not waive/exempt the Exit Load charged on Investment/ redemptions, the investors will incur load expenses on two occasions. First, on their redemptions/ switches under the Scheme and second on the Scheme's redemption/ switches under the underlying schemes.

Risk factors Specific to Aditya Birla Sun Life Balanced '95 Fund:

Investments in the Scheme are subject to various risk factors including but not limited to risks associated with investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of dividends and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. Dividend payouts will be entirely at the discretion of the Trustee. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units.

Aditya Birla Sun Life MNC Fund

Stock Selection Strategy: The investment emphasis of the Scheme would be on identifying companies with sound corporate managements and prospects of good future growth. A track record of superior performance and corporate governance will be added considerations. Essentially, the focus would be on stocks driven by long term fundamentals. However, short-term opportunities would also be seized, provided underlying values supports these opportunities.

Liquidity will be very important consideration for investment decisions, due to the potential of large redemptions inherent in open-end schemes. As a result, a significant proportion of the Scheme's equity investments will be made in relatively liquid large capitalization stocks, including established blue-chips and emerging blue-chip stocks. In addition, as far as supported by liquidity considerations, investments in small and medium capitalization growth stocks will also be emphasized in expectation of higher returns. A portion of the funds will also be invested in IPOs and other primary market offerings that meet our investment criteria.

Aditya Birla Sun Life India Opportunities Fund

Investment Strategy would focus on achieving superior risk adjusted returns by investing in attractively priced shares of companies that are poised for rapid growth in Revenues and Profits. These companies would fall into two broad categories. One set of investment opportunities includes information technology (IT) and IT-related companies, media, telecom, pharmaceutical and bio-technology companies. These companies use a combination of intellectual capital and lower labour costs to deliver high quality and low cost solutions.

The second set of companies where the scheme would invest will come from sectors that are not directly related to IT and related companies. So far, we have seen India's low cost and intellectual capital being exploited in the field of services and pharmaceutical research. We believe India is now ready to play an increasingly important role in exports of manufactured goods like auto ancillaries, generic & bulk pharmaceuticals and textiles. These represent large business opportunities where India has medium-to-long term competitive advantage. The key criteria for evaluation would be whether foreign exchange earnings form a material portion of revenue and exports and is the key thrust area for future growth.

Thus, the scheme aims to be a vehicle for investing in India's role in the Global Outsourcing Theme.

Stock Selection Strategy

The scheme would invest a substantial portion of its investible assets (over 65%) in the investment universe as defined above.

In order to diversify the portfolio, the fund manager may invest upto 30% in stocks which other than as defined in the investment universe above. A small portion of the portfolio may be kept in call and money market instruments in order to meet the liquidity needs.

above-mentioned sectors or other areas of Infrastructure as may be identified by the Scheme. Aditya Birla Sun Life India GenNext Fund

Indian economy has seen a paradigm change in the consumption habits in the last decade.

This pattern is fuelled not only by the opening up of the Indian economy but also due to integration with the global markets. The rising income levels in India are primarily guiding the high value consumption patterns. The rising levels of consumption are also being led by a growing breed of young educated mass of people working in areas like call centers, service desks, IT companies, Financial Services etc. This young educated mass is earning well and spending well. The young generation has consumption habits that are markedly different from the existing middle class population.

It is a well-accepted fact that service industry is a major employment generator, as the primary reliance in service sector is on human capital.

Aditya Birla Sun Life India GenNext Fund seeks to invest in such companies that are in products or services, which cater to the young consumers, or companies that have distinct brand identities and therefore enable choice. Some of the sectors that are expected to benefit from this rising propensity to spend are:

- Automobiles
- Hospitality
- Travel and tourism
- Pharmaceutical and Health Care
- Utilities companies like telecom, power distribution etc.
- Retail chains
- Consumer Goods
- Consumer Durables
- Financial services and banks
- Housing finance companies

The scheme would seek to invest in these sectors as well as others that cater directly to the consumers.

Stock Selection Strategy

The companies that are part of the eligible universe for investment by the Scheme should have the following characteristics:

- A substantial portion (at least 50% of the sales / revenue) of the companies products and services should be going directly to the consumers. In other words, the investment universe would exclude companies that are primarily in commodities and intermediates (products and materials that go into making products for consumers).
- The eligible companies for the Scheme should preferably have products/services, with distinct brand identity that enables choice.

Aditya Birla Sun Life Index Fund

The scheme will be managed passively with investments in stocks in a proportion that is as close as possible to the weightages of these stocks in the NIFTY. The investment strategy would revolve around reducing the tracking error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of stocks in the index as well as the incremental collections / redemptions in the scheme.

Aditya Birla Sun Life Top 100 Fund

The scheme is designed for those investors who seek exposure to a broader large market capitalization stocks and Growth cum value style of investing. The scheme shall invest at least 65% of its corpus in equity and equity related securities of top 100 Indian companies as measured by market capitalisation (stock market worth) and listed on stock exchanges. Securities listed on the National Stock Exchange of India shall be considered to determine the top 100 market capitalization companies. The universe would also include those companies coming out with New Fund Offerings and whose post issue market cap (based on issue price) would be amongst the largest 100 Indian companies. The remaining portion of the portfolio will be invested in equity and equity related securities of companies other than the Top 100 companies which in the opinion of the fund manager have attractive growth prospects and potential to outperform the broad market indices. The scheme may also invest in ADR/GDR and equities of listed overseas companies. These investments will be made in line with the RBI and SEBI guidelines and will be within the limits prescribed by SEBI/RBI from time to time.

Aditya Birla Sun Life Equity Fund

The Scheme would adopt top-down and bottom-up approach of investing and will aim at being diversified across various industries and / or sectors and/ or market capitalization. The investment emphasis of the scheme would be on identifying companies with sound corporate managements and prospects of good future growth. Essentially, the focus would be on stocks driven by long-term fundamentals. However, short term opportunities would also be seized, provided underlying values supports these opportunities. A portion of the scheme will also be invested in IPOs, emerging sectors, concept stocks and other primary market offerings that meet our investment criteria.

The scheme would invest a substantial portion of its investible assets (80% - 100%) in equity and equity related instruments. Pending investment of the scheme may be invested in debt & money market instruments and other liquid instruments or both. The scheme may have prudent exposure to Futures & Options (F&O) to capture opportunities arising out of market imperfection and to hedge the portfolio, whenever necessary.

Aditya Birla Sun Life Frontline Equity Fund

The Scheme will aim at being as diversified across various industries and/ or sectors as its chosen benchmark index. It will target the same sectoral weights within its equity portfolio as the benchmark index on a designated day subject to some predetermined flexibility. However, the Scheme shall have the flexibility of selecting stocks within a particular sector from a wider investment universe. So while the equity component of the Scheme's portfolio will track sectoral weights of the chosen benchmark index, the stocks making up those sectoral weights in the Scheme's portfolio could be different from those comprising the relevant sectoral weights in the index. However, such stocks will be from the same sectors although they may differ from the index constituents on account of the Scheme's investment universe being wider than index stocks.

The sectoral weights will be computed by aggregating market values of individual stocks sector wise, as a percentage of the total market value of the equity component in the Scheme's portfolio. The Scheme will have the flexibility of varying the sectoral weights by $\pm 25\%$ of the sectoral weights in the index on the designated day, or by an absolute figure of $\pm 3\%$, whichever is higher. For example, if the sector weight in the index on the designated day is 15%, the $\pm 25\%$ rule will apply and the Scheme will maintain a weight between 11.25% and 18.75%. For a sector comprising 10% of the index, the Scheme could have an exposure of between 7% - 13% to that sector in the equity component in its portfolio since in this situation; the $\pm 3\%$ rule will become applicable. This implies that sectors with less than 3% weights in the index on the designated day may be ignored. The Scheme's equity portfolio will attain the sectoral diversification of the index on the designated day computed in the above manner, by the month-end after the designated day. The Scheme may invest up to 25% of its net assets in cash, government securities, debt and money market instruments. This limit may not be exceeded for a continuous period of 30 days without the approval of / ratification by the Trustee.

The Scheme has currently chosen S&P BSE 200 as its benchmark index. The designated day shall be the 23rd of every month. If 23rd is a non-Business Day, the immediately preceding Business Day shall be the designated day for that month. The equity portfolio of the Scheme will match the sectoral diversification of the benchmark index on the designated day, by the last calendar day of each month or if it is a non-Business Day, by the first Business Day of the next month. The Scheme will typically attain the sectoral weights of the benchmark index by the last Business Day of each month.

The Scheme's investment universe shall comprise all listed and / or unlisted stocks. The Scheme will endeavour to invest in 'frontline' stocks i.e. stocks which in the opinion of its Fund Manager, provide superior growth opportunities. The stocks will be categorised into the sectors making up the benchmark index by the Trustee.

Notwithstanding the foregoing investment policies for the scheme, for temporary defensive purposes (e.g., during periods in which the Asset Management Company believes changes in the securities market or economic or other conditions warrant), the scheme may invest in Indian Government T-Bills and hold cash or cash equivalents and other money market instruments. The Trustee of the Mutual Fund may from time to time alter these limitations in conformity with the SEBI (MF) Regulations, 1996 and other guidelines or notifications that may be issued by SEBI.

The stock selection strategy under the Plans would be a blend of top down and bottom up approach without any sector or market capitalization bias. All companies selected will be analyzed taking into account the business fundamentals like nature and stability of business, prospects of future growth and scalability, financial discipline and returns, valuations in relation to broad market and expected growth in earnings, the company's financial strength and track record.

BSLAMC has tied up with Standard & Poor's Investment Advisory Services LLC (SPIAS) for seeking portfolio advice on the international portion of the fund's portfolio. SPIAS is a division of Standard & Poor's and has a long track record in providing investment advisory services to institutional clients. The fees related to these services would be borne by BSLAMC and would not be charged to the scheme.

SPIAS, as part of this arrangement, would create a model portfolio for BSLAMC using their proprietary methodologies. This model portfolio would be used for creation of the international portfolio of the scheme. The fund management of the Scheme (including the international portion) shall rest with Aditya Birla Sun Life Asset Management Company Ltd.

As one of their proprietary methodologies for portfolio construction, SPIAS would use the renowned STARS ranking system of Standard & Poor's. "STARS" stand for Stock Appreciation and Ranking System, and is being used for ranking stocks across various parts of the world including U.S., Europe as well as Asia. The STARS system was started in the year 1987 and has more than 26-years of track record.

Aditya Birla Sun Life Special Situations Fund

The objective of the Scheme is to generate long-term growth of capital by investing in a portfolio of equity and equity related securities. The Scheme would follow an investment strategy that would take advantage of Special Situations and Contrarian investment style.

Special Situations: Special situations are out of the ordinary situations that companies find themselves in from time to time. Such situations present an investment opportunity to Fund Manager who can judge the implications of that opportunity that can unlock value for investors.

There could be many such situations that may have the potential to unlock value of the companies. Some of these situations are-

1. De- Mergers: Corporate actions often unlock a lot of value for the investors. Demergers may result in separation / spin-off of business operation / activity from some other business operation / activity. There may be unlocking of value for an investor.
2. Mergers: Merger of businesses or companies may result in synergies in business activities. This may result in value unlocking for the companies getting merged.
3. Debt Structuring: There may be corporates that have higher debt on their balance sheets resulting in lower profitability and cash flows. The cost of debt may also be high resulting in reduced profitability. Any attempt by the corporates to either reduce the debt burden or swap the existing debt with lower cost options may result in value unlocking.
4. Buy-Back: Companies may consider a buy-back of their shares from the market due to various reasons like - company has substantial free reserves, management is confident of the future growth potential, meeting with the regulatory norms, etc. These events may lead to value unlocking for the company.
5. Other Situations: There could be many other events that may result in share price appreciation. Situations like introduction of new products, new segments, acquisition of new customers, R&D related developments, management re-structuring, capital infusion, revaluation of Fixed Assets, Properties or other assets, etc. might result in a favorable environment for stock price appreciation.

The scheme intends to carefully look at such special situations and participate in them based on the potential for stock appreciation.

Contrarian Investing: Strategy would comprise of investing in companies that are currently out of favor, overlooked or neglected due to temporary fallacies like poor results, failure with regards to the product launch, factor affecting the industry, political interventions, etc. However, these companies may be fundamentally strong but market may have failed to recognize their true potential. The Scheme may invest in such undervalued companies to take advantage of price appreciation.

Investment strategy would be to identify stocks based on the above mentioned criteria and benefit from the event. These events may or may not be time bound. Investment strategies would include but not be limited to the above-mentioned strategies. Scheme will be a style diversifier for an investor.

The Scheme may also invest in companies outside India, to the extent permitted under and in accordance with applicable regulations.

The Scheme would follow a bottom-up investment approach, where investments will be selected based on specific criteria relevant to the company. There will be no bias towards size or sectors. Companies selected will be analyzed taking into account the business fundamentals like nature, stability of business, prospects of future growth and scalability, financial discipline and returns, valuations in relation to broad market and expected growth in earnings, the company's financial strength and track record, etc.

Aditya Birla Sun Life Commodity Equities Fund - Global Agri Plan

The Scheme will predominantly invest in overseas companies or overseas mutual funds investing in companies that have business exposure to agricultural commodities. Such companies could include producers of agricultural products, crop growers, owners of plantations, companies that produce and process foods, fertilizer producing companies etc.

The scheme will be managed by investing in stocks that are also a part of the S&P Global Agribusiness Index. S&P Global Agribusiness Index is an equity based index designed to provide liquid exposure to 24 of the largest publicly-traded agribusiness companies comprised of a mix of Producers, Distributors & Processors and

Equipment & Materials Suppliers companies.

Fund manager will undertake an active investment management strategy. Investment in stocks will be based on a bottom up approach. There will be no market capitalization or geographic bias. The Scheme may also undertake active cash calls if the situation so warrants.

Further, the Scheme may invest in units issued by overseas mutual funds. Such investment in the funds will not be more than 35% of the portfolio value. The selection of an overseas mutual fund will be based on parameters like:

- Appropriateness of the Fund, with regard to the Scheme's investment objective,
- Track record of the Fund under consideration,
- Reputation of the Fund house which has launched the Scheme

Though every endeavor will be made to achieve the specified objectives, the AMC / Trustees / Sponsors do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.

Aditya Birla Sun Life Enhanced Arbitrage Fund

Scheme seeks to generate income by predominantly investing in equity and equity linked instruments.

Scheme aims to identify the price differentials prevailing for a stock / index in 2 market segments (cash, futures, etc). Trades are executed once the price differentials are identified. Generally, trades will be executed provided that they generate returns higher than short term debt instruments (call money, money market instruments, liquid schemes, etc) net of expenses.

Scheme will buy a stock where it is available cheap and sell the stock where it is quoting at a higher price. Simultaneous buy and sell trade will be entered into in both the market segments (Cash & Futures). Gains that the trade would offer, is identified at the time of execution. On expiry of the futures contract, there is a convergence of price of a stock in cash & derivatives segment. Thus gains are secured / assured irrespective of the market movements, only at the end of the month i.e. on expiry of the futures contract. If these trades are unwound prior to expiry, then they may / may not generate the pre-specified returns.

The scheme shall also undertake Securities Lending and Borrowing within the framework as permitted by SEBI.

However, if these trades fail to exist / if the returns generated are lower than that offered by liquid schemes / index, then the scheme may undertake a higher allocation to debt and money market securities.

A portion of the corpus will also be invested in direct equities, IPO's, Options, open offer and buy-back. Allocation to these strategies will be restricted to the extent of 10% of the corpus size.

Aditya Birla Sun Life India Reforms Fund

The scheme would seek to invest in companies that are expected to benefit from the government reforms program. These companies would encompass, but not be limited to, engineering, real estate & construction, power, telecom, infrastructure, financial services, Fertilizers, agrochemicals, irrigation, education and select commodity sectors. Investments will be pursued in selected sectors based on the investment team's analysis of business cycles, regulatory reforms, competitive advantage etc. Selective stock picking will be done from these sectors. The fund manager in selecting scrips will focus on the fundamentals of the business, the industry structure, the quality of management, sensitivity to economic factors, the financial strength of the company and the key earnings drivers. The scheme will invest across sectors without any market cap or sectoral bias.

The scheme shall also undertake Securities lending and Borrowing within the framework as permitted by SEBI.

Aditya Birla Sun Life Pure Value Fund

The fund would follow a value investing strategy for the management of its portfolio.

Value investing is buying into stocks that are trading for less than their intrinsic value - stocks that the market is undervaluing. Typical value investing strategies include, strategies like:

- Buying stocks with a low price to book value,
- Low price to cash flow,

Value Investing is similar but not the same as contrarian investing. The key difference between contrarian investing and Value Investing is that in latter there is a gap between underlying value of the company (asset, earnings or holding value) and the market perception of the same. In case of contrarian investing, the stock is out of favor and is trading at a valuation lower than its recent past and not necessarily at a discount to its inherent value.

Key underlying assumption in Value Investing is that markets are inefficient and over a period of time the market will discover and find the right value for the stock.

Value strategy, is a conservative way of investing in Equities. The primary reason is that these stocks are already available at a substantial discount relative to the general market levels. As such the downside in such stocks is relatively lesser.

The value strategy, while being a blend of Top down and Bottoms up, essentially focuses on companies with long track records and excellent managements. As such the probability of these companies to improve their fundamentals with changing business dynamics is relatively strong.

Aditya Birla Sun Life Small & Midcap Fund

The corpus of the Scheme will be primarily invested in Small and Mid Cap equity and equity related securities of the companies in the small and midcap segment that have a potential to appreciate in the long run. The Scheme may also invest a small portion of its corpus in fixed income securities including money market instruments to manage its liquidity requirements. The fund manager will select equity securities on a bottom up stock selection approach. Under bottom-up approach, the main focus is on identifying stocks on their individual merits irrespective of the sectors to which they belong as opposed to first identifying sectors and then choosing stocks within that sectors which is followed under top-down approach. Hence, under bottom-up approach among other things, consideration will be given to fundamentals of the companies, management quality & strength of their businesses.

Apart from sound fundamentals and management, the fund would lay emphasis on valuations and long term growth potential. The stocks of small and midcap companies are generally more volatile and less liquid than the large cap stocks. The focus would be on long-term fundamentally driven values. However, short-term opportunities would also be seized, provided they are supported by underlying values. As part of the investment strategy, fund will book profits regularly to take advantage of the volatility in the market.

Aditya Birla Sun Life Banking and Financial Services Fund

The Scheme aims to maximize long-term capital appreciation by investing primarily in equity and equity related securities of companies engaged in Banking and Financial services. As a Sector fund, the portfolio will concentrate in the companies engaged in Banking and Financial Services. The portfolio manager will adopt an active management style to optimize returns. Income generation may only be a secondary objective.

The scheme would invest in Banks as well as Non-banking Financial Services companies, Insurance companies, Rating agencies, Broking companies, Microfinance companies, Housing Finance, Wealth Management, etc. The classification of Financial service companies will be largely guided by AMFI sector classification. The scheme may also invest in IPOs of companies which could be classified under Financial Services sector.

As the benchmark index is skewed in favour of few stocks, the fund could have substantial deviations from the respective weightage in the benchmark index so as to achieve diversification within the sector.

Aditya Birla Sun Life Balanced Advantage Fund

Investment Policy:

Equity: The fund manager will invest into opportunities available across the market capitalization. The fund manager will use top down approach to identify growth sectors and bottom up approach to identify individual stocks. The fund would have the flexibility to invest in stocks across different market capitalization. The fund would therefore contain a blend of large, mid and small cap stocks. The allocation to the different market caps would vary from time to time depending on the overall market conditions, market opportunities and the fund manager's view. The Scheme may also use derivatives to hedge the downside risk of the portfolio. The Equity Allocation in the portfolio would be monitored on a monthly basis and rebalanced by the Fund Managers at the end of every calendar quarter. The Scheme will take a call on the asset allocation based on the PE ratio of S&P BSE 100 index. When the markets seem to be moving to overvalued territory as indicated by Higher PE ratio, the scheme would reduce Equity allocation and vice versa. The Equity exposure will be actively managed based on the same, and the residual allocation will be in Debt & Money Market Instruments. The table for Equity exposure based on Trailing PE of S&P BSE100 is as follows:

P/E Range	Asset Allocation Range
<14	80-100
14-17.5	60-90
17.5-21.5	45-75
21.5-25	30-60
25+	0-40

Historically such a strategy of varying the Equity allocation based on PE Ratio has helped deliver superior risk adjusted returns, although there is no guarantee that such past performance will be repeated in the future.

The actual percentage of investment in equities and Fixed Income Securities within the range will be decided after considering factors such as:

1. The expected earnings growth of the Market
2. The quantitative valuation parameters in the historical as well as global context:
 - P/B Ratio
 - Price / Earnings Growth Ratio
 - Price / Free Cash Flow
 - Price / Cash EPS
 - Earnings Yield to Bond Yield (i.e. Yield Gap)

3. Expected Fund Flow
4. Economic cycle

In addition, Institutional inflows and RBI monetary policy may also have an impact on asset allocation.

After analyzing some or all the factors mentioned above, Investment Team determines the relative allocation to equity and debt instruments and money market securities

Any change in the P/E range and corresponding asset allocation range specified at the table above would amount to change in fundamental attribute of the Scheme and accordingly, before giving effect to the change, unitholders will be provided option to exit in accordance with Regulation 18(15A) of SEBI (Mutual Fund) Regulations, 1996 or any amendments thereto.

The Scheme may seek to reduce volatility of returns by actively using derivatives as hedge. This may make the Scheme forgo some upside but shall help protect downside in the endeavour to deliver better risk-adjusted returns over the long term.

Aditya Birla Sun Life Tax Savings Fund

The fund managers will follow an active investment strategy taking defensive / aggressive postures depending on opportunities available at various points of time.
